2.6.2. Attainment of Programme outcomes and course outcomes are evaluated by the institution.

Response:
During the academic year 2020-2021, attainment of program out comes and course outcomes was somewhat different than in previous years because of lock down in first and second waves of the Covid-19.

The outcomes are measured over a period of time through the performances of the students in their various different roles they play in different activities. It is also observed how deeply the students of the college are involved in curricular, co-curricular and extracurricular activities through different activities of their departments, NSS, NCC, Saptadhara and various committees. Students participate in activities from the very beginning and successfully complete the same during their college years. Where-ever there are practical and assignments, the measurement is through the internal and external examinations. The students' participation in the class activities, role in the departmental activities are some ways by which program specific outcomes are observed. The students are encouraged to take part in the competitions, seminars, conferences, research competitions. Course outcomes are measured through the performance of the students in their academic activities. Their performance in the internal examinations gives an indication of their learning outcomes.

Teachers conducted online test and gave assignments to the students. On that basis the critical observation about the performances of the students was done and also online guidance was given to them to improve performances in the examinations. The college has the mechanism to analyze data on the student performance and learning outcomes; to use it for planning and overcoming barriers of learning, result analysis, remedial coaching, student counseling, feedback mechanism and action taken report etc.
